BUSINESS TERMS

We especially invite Charge Accounts. A charge account is more convenient than to remit for each order at the time it is sent us; you pay no more for your goods by reason of this accommodation. As to our responsibility, we refer you to **Dun's** or **Bradstreet's Mercantile Agency.**

When sending your first charge order, refer preferably to some one in either your own or our line of business with whom you have a charge account. This frequently saves delays.

NET CASH ITEMS

Grain, Clover, Bird and Farm Seeds, also Fertilizers, are handled on very close margins and are sold with no cash discount.

DISCOUNTS

On bills for Flower, Vegetable Seeds and Bulbs, a discount of 2% for payment 10 days from date of bill may be deducted, if cash accompanies the order 3% may be deducted on such items. All other goods are strictly net, as are also bills for goods supplied under special quotation unless otherwise agreed upon.

All contracts and acknowledgments are contingent upon crop failures, partial deliveries by growers or manufacturers, strikes, or other unavoidable causes beyond our control, also unsatisfactory credit standing. All quotations are subject to market changes and goods being unsold on receipt of order. Henry F. Michell Company endeavors to send out only the very best quality of Seeds, Bulbs and Plants, but cannot guarantee results or crops. If customers do not accept goods on the above conditions, they can be returned to us within ten days.

TRANSPORTATION ADVANTAGES POSSESSED BY PHILADELPHIA

Freight—Philadelphia's transportation facilities are unsurpassed by any other city in the U. S. The Pennsylvania R. R., Philadelphia & Reading R. R., Lehigh Valley R. R., and the B. & O. R. R. all have terminals in Philadelphia. These lines offer special facilities and quick transportation to any part of the U. S. Several of them touch with their own lines extreme North, South, East and West. Where they do not run direct, they have traffic agreements with connecting lines.

Boat Connections—The Clyde Line S. S. Co. and the Merchants & Miners S. S. Co. sail direct from Philadelphia for points as far south as Jacksonville, and the connections they have with the Mallory Line serve other extreme southern points. The Merchants & Miners Line also sails direct from Philadelphia to Boston, from where it serves points in New England. Boat transportation affords one of the quickest and most economical ways in existence to-day for shipping goods.

Express Service—Philadelphia is served by express service of the Adams, Wells-Fargo, and American Express Companies, which reach every part of the U. S. Goods consigned to any point on their lines can be forwarded without transfer. Express rates are extremely moderate, compared to what they were, and we recommend this service, where quick delivery is wanted and especially for the transportation of plants and other perishable goods. Seeds, Plants and Bulbs enjoy a special express rate, lower than what is demanded for carrying general merchandise.

PARCEL POST

This method provides a quick, reasonably safe and inexpensive transportation of such goods as will be accepted by Parcel Post, such as flower, vegetable, grass and field seeds and many sundries; liquid preparations cannot be mailed with safety.

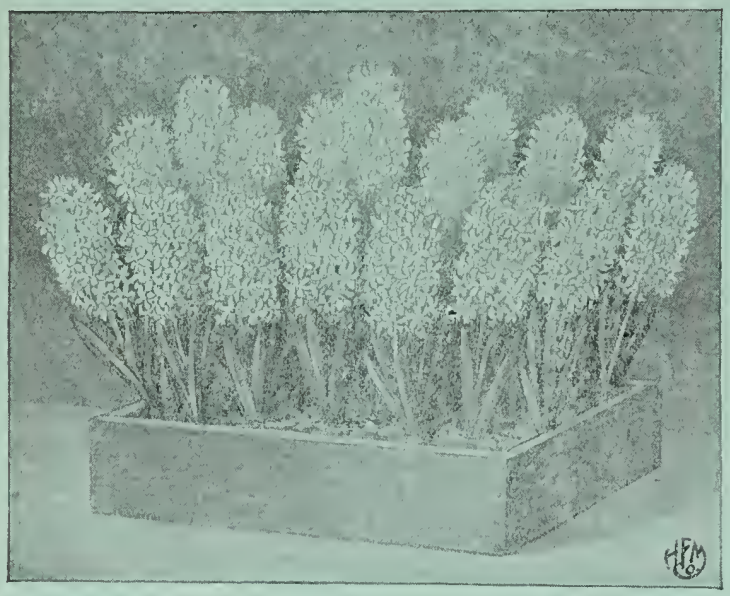
DUTCH ROMAN HYACINTH "L'INNOCENCE"

(French Grown)



These are grown in the south of France, which ensures the bulb ripening early to permit arrival in this country in fine condition sooner than the Dutch-grown bulbs of this type.

On account of the advaneed priee of regular French Roman Hyacinths, and the fact that these French-grown Dutch Romans (which we have in this one variety only) can readily be forced for Christmas, we predict a heavy sale—note the low price for large bulbs. See page 4.

UNNAMED HYACINTHS

(For Bedding and Forcing)

Our stock of these is unusually large and fine; we recommend them for bedding only, although many florists still use them for forcing; for the latter purpose, however, we would advise the planting of the **Second or Third Size Named Hyacinths** offered on this page, as they seldom fail to give complete satisfaction; also **First Size Hyacinths** on page 4.

NARCISSUS GOLDEN SPUR

(*Ready in August*)

In comparison with the regular Dutch strain, planted side by side at the same time, we found these to be from ten days to two weeks earlier. If anything, the flowers were larger and the stems 2½ to 3 inches longer. The bulbs are very free-flowering and we predict for this strain a wide future. We recommend it for Christmas or New Year's forcing. Crop is usually very short.

THE WONDERFUL SCARLET GERANIUM "HELEN MICHELL"

"Helen Michell" is Semi-Double, of the Clearest Possible Shade of Scarlet, is Early in Bloom, and Flowers Very Freely During the Entire Season

It grows compact medium dwarf, with lustrous green foliage and throws up gigantic flower-heads very freely. We claim it to have the largest flower-heads of any of the Bedding Geraniums. The individual blooms frequently measure 2½ inches across. It is a common occurrence that a single 4-inch pot plant shows four fully open gigantic flower-heads, several half open and more in bud. For earliness and constancy of bloom it surpasses all other Geraniums. We further claim **ichell" is the Best Commercial Geranium**

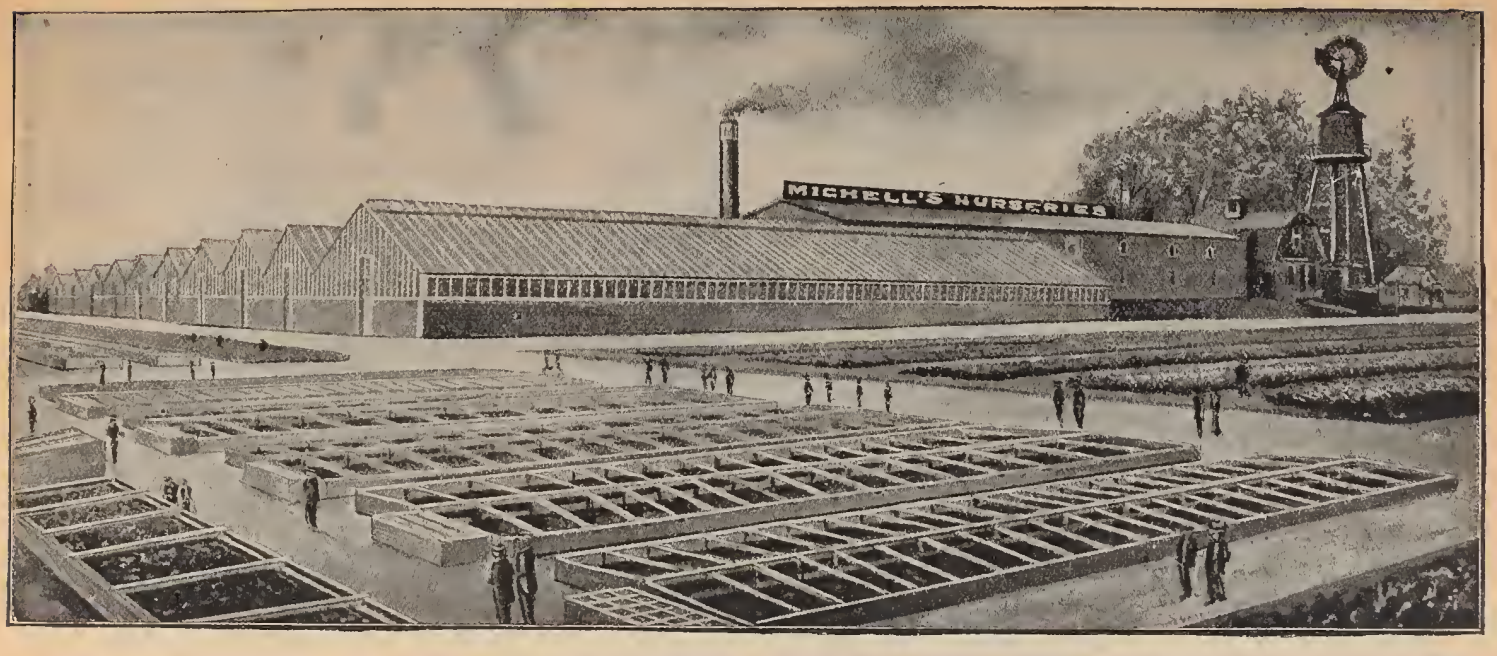
MICHELL'S HARDY PERENNIAL PLANTS



Partial View of Greenhouses and Frame Yard—Michell's Plant Establishment, Andalusia, Pa.

Every florist who has ground around his establishment should plant some varieties of Perennials, especially those kinds which furnish bloom in summer for design and bouquet work.

Michell's Publication—Hardy Perennials and How to Grow Them

An interesting book will be mailed free to applicants. While compiled primarily for the amateur, it makes interesting reading for the experienced florist.

SPECIAL NOTE.—No order for plants that does not aggregate $1.00 or more will be filled at wholesale prices; such will be charged at retail prices less 10%.

It is not all surprising that these grand old-fashioned garden flowers are to-day enjoying the greatest popularity, because there is not a time during the spring, summer and autumn in which some hardy perennial is not in bloom. During the past season we have added considerably to our list of varieties, and omitted some which were surperseded by better sorts. The soil in our nurseries is especially adapted for producing this class of stock. Give us a trial order in this line, and we feel sure that you will be pleased.

MICHELL'S GORGEOUS PAEONY ROOTS

We send out extra strong Paeony roots

Paeonies are rapidly coming to the foreground and are now considered by the florists an indispensable cut flower. A collection of Paeonies constitutes a most valuable asset, steadily increasing in value from year to year. Paeonies as cut flowers always demand a good price and yield a very profitable income from the investment. For home and table decorations they are exceedingly effective, and last in water longer than most other flowers. For social functions, weddings and church decorations there is nothing more suitable. Festiva Maxima and Officinalis types are usually ready in the latitude of Philadelphia by Decoration Day. The flowering period of others is carried through the month of June. Paeonies require, after planting, practically no attention except a top dressing of well-rotted manure in the late autumn. They respond to this treatment by producing an extra large crop of flowers. Few, if any, insects attack the Paeony.

Be Progressive; Plant Paeonies.

CULTURAL NOTE ON PAEONIES

Autumn or during April is one of the best times for planting. The soil should be well enriched with well-rotted manure. The roots should be set about 3 feet apart in rows, the latter 4 feet apart, to enable them to be cultivated with horse machines. The crowns should not be set more than 4 inches below the top of the soil; deeper planting may mean fewer flowers, sometimes none. Cultivate them freely, prior to and after the flowering season. In the spring, as soon as the ground can be worked, plow or work in a heavy coating of well-rotted manure each season.

MIXTURES FOR MISCELLANEOUS PURPOSES

Michell's Permanent Pasture Grass Seed. In the past few years ideas of what was the best way to establish a permanent grazing sod have undergone many changes. The old prevalent method of sowing timothy and clover has been found not only costly, but too short-lived to answer the purpose. The old custom has given way to the new, which is the sowing of a mixture of permanent grasses. Michell's Permanent Pasture Grass Seed is composed of about 10 of the best growing and most nutritious grasses and clovers for stock feeding or grazing. One sowing will last many years, although we advise additional sowing each autumn, just previous to which a light harrowing is recommended to give the grass a quick hold. Sow 3 to 4 bushels per acre on new land or 2 bushels on established pastures (15 lbs. per bushel), Prices: per qt., 15c.; 4 qts., 45c.; per peck 70c.: per bushel (15 lbs.), $2.50; 100 lb. lots and over, 15c. per lb.

Michell's Permanent Hayfield Grass Seed. While timothy is still extensively sown for this purpose, this mixture is gradually being adopted by the progressive farmer. Its main advantages are that certain grasses in this mixture will grow better in varying conditions of soil, thus giving a full crop of hay on land that otherwise might produce but a half crop of timothy and clover. Our formula is the outcome of thorough trials in every kind of soil. Sow 3 to 4 bushels per acre on new lands or 2 bushels on established fields (15 lbs. per bushel). Priees: per qt., 15c.; 4 qts., 45c. per peck, 70c.; per bushel (15 lbs.), $2.50; 100 lb. lots and over, 15c. per lb.

Michell's Poultry Yard Grass Seed. Chickens love grass and should be placed where they can get it as much as possible. We put plenty of clover seed in this mixture, as it is very nutritious, and the fowls relish it (15 lbs. per bushel). 15c. per qt.; 4 qts., 40c.; 60c. per peck; bushel, $2.25; 100 lb. lots and over, 14c. per lb.

WHITE CLOVER

Choice recleaned for sowing on lawns, pastures, etc. Sow 10 to 12 lbs. per acre (60 lbs. per bushel). Per ¼-lb., 15c.; 55c. per lb.; 5 lbs., $2.65; $5.00 for 10 lbs.; per bushel, $20.00; per 100 lbs., $48.00.

MICHELL'S SPECIALTIES FOR THE FLORIST

Alphano Humus

It is very desirable for greenhouse and flower garden work, also for lawns and vegetables. It is rich in Ammonia, Phosphoric Acid, Potash and Lime, and shows an analysis of between 77 and 80 per cent. of Humus.

For pot plants mix about ⅓ of the Humus with ⅔ of regular potting.

For lawns and greenhouse benches it is applied as a top dressing from ½ to 1 inch in depth, which should be then worked in.

The following quantities are required to effectively cover an acre, depending upon the liberality with which it is applied. If applied ½ inch in thickness, 30 tons per acre; if 1 inch thick, 60 tons per acre; if 2 inches thick, 120 tons per acre; and for general lawn work, as a top dressing, 100 lbs. will effectively treat about 800 square feet. One ton will effectively treat about one-third acre. Of course, smaller quantities applied are beneficial in proportion to the application.

Michell's Keystone Plant Tubs

Plants, large or small, appear always to better advantage when planted in tubs instead of pots. They are easier handled because they are much lighter in weight; they are more attractive and bring a higher price. Tubs have welded hoops, except bottom hoop, which is flat (and neat handles, when desired, at extra prices, as mentioned below). Unlike pots, they do not break, nor do they require special packing when used in shipping. Made of white cedar, they are by far the cheapest, neatest, lightest and best florist tub put on the market.

Wizard Brand Manures (Free from Weeds)

WIZARD BRAND CATTLE OR COW MANURE

This is carefully selected manure taken from brick-paved cattle pens at Western Stock Yards, where the highest quality of Cattle Manure is available in large quantities. It is kept entirely separate from other manures and is reduced by the Wizard Brand process of direct heat drying and screening, but is packed in coarse, shredded form instead of being finely pulverized.

Cattle Manure is slower acting than sheep manure, and is especially suited to every need of the rose grower for soil mixing, mulching and liquid manuring. It is used by many of the largest rose growers in this country.

This is probably the most extensively used of animal manures by the florist and market gardener. The analysis shows it to be a perfectly balanced plant food.

Pulverized Sheep Manure acts quickly and is invaluable for carnations, mums and other crops that require a quick stimulant at certain stages of development or because of unfavorable weather conditions.
